

1 2 3 4 5 6

A MAN HAS A ONE IN SIX
CHANCE OF DEVELOPING
PROSTATE CANCER
DURING HIS LIFETIME.

Some men have an even greater risk, including men 50 and older, African-American men 40 and older, and men 40 and older who have a family history of prostate cancer.

Is a prostate cancer screening right for you? Before you can decide, you need to know the facts. The more you know about your risk for prostate cancer, the more you can put the odds in your favor.

Don't miss your opportunity to speak with health professionals and learn more about prostate cancer. Free prostate cancer screenings will be available.

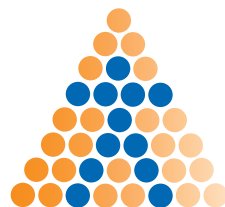

Visit arprostatecancer.org or call 1-800-338-1383 for more information.
